Absorption, Particle (*see Energetic Particles*)

Absorption, Radio (*see Radio Emission*)

Abundances
Abundances of Carbon, Oxygen, and Neon in the Solar Wind during the Period from August 1978 to June 1982
P. Bochsler, J. Geiss, and S. Kunz **103**, 177
Helium and Minor Ions in the Corona and Solar Wind: Dynamics and Charge States
A. Bürgi and J. Geiss **103**, 347
Solar Flare Neutrons and Their Capture Gamma Ray Emission
X.-M. Hua and R. E. Lingenfelter **113**, 229

Acceleration, Mechanisms (*see Energetic Particles, Acceleration*)

Active Longitudes (*see Active Regions, Complexes, Nests, Zones of Activity*)

Active Regions
Some Results of a Morphological Study of the Evolution of the Active Region of July, 1982
M. B. Ogir, L. D. Parfinenko, and M. N. Stoyanova **102**, 67
Solar Irradiance Variations from Photometry of Active Regions
G. A. Chapman and A. D. Meyer **103**, 21
Coronal Interconnection of Two Active Regions Observed in 3.5-8.0 keV X-Rays
František Fárník, H. Frank van Beek, and Zdeněk Švestka **104**, 321
Chromospheric 'Active Region Loops'
C. Fang and M. J. Martres **105**, 51
Sunspot Nests. Manifestations of Sequences in Magnetic Activity
M. J. M. Castenmiller, C. Zwaan, and E. B. J. van der Zalm **105**, 237
A Small-Scale Energy Release Observed on the Limb. I: The Broadened Components of D3 Emission Lines
Ichiro Kawaguchi, Kap-Sung Kim, and Yoshihiro Nakai **106**, 47
Culgoora Radio and Skylab EUV Observations of Emerging Magnetic Flux in the Lower Corona
R. T. Stewart, G. E. Brueckner, and K. P. Dere **106**, 107
Variation of the Solar Constant Connected with the Coronal Activity
Judit Pap **109**, 373
Sunspot Cycle Variations of Ensemble-Averaged Active Regions
John K. Lawrence **110**, 73
The Separation Velocity of Emerging Magnetic Flux
Dean-Yi Chou and Haimin Wang **110**, 81
The 17-Month Periodicity of Sunspot Activity
M. Akioka, J. Kubota, M. Suzuki, K. Ichimoto, and I. Tohmura **112**, 313
An Empirical Basis for the 'Alternative Interpretation' of Sawyer *et al. (Letter)*
P. A. Stahl **112**, 387
Subphotospheric Current Systems and Flares
Hugh S. Hudson **113**, 315

Active Regions, Complexes, Nests, Zones of Activity
Sunspot Nests. Manifestations of Sequences in Magnetic Activity
M. J. M. Castenmiller, C. Zwaan, and E. B. J. van der Zalm **105**, 237
A Statistical Study of the Spiral Spots on the Solar Disc
Y. J. Ding, Q. F. Hong, and H. Z. Wang **107**, 221
Energetic Flare Zones on the Sun
V. K. Verma, M. C. Pande, and Wahab Uddin **112**, 341

Active Regions, Evolution
Some Results of a Morphological Study of the Evolution of the Active Region of July, 1982
M. B. Ogir, L. D. Parfinenko, and M. N. Stoyanova **102**, 67
On the Initial Orientation of Emerging Active Regions
J. I. Garcia de la Rosa **103**, 249
The Separation Velocity of Emerging Magnetic Flux
Dean-Yi Chou and Haimin Wang **110**, 81

Two Distinct Morphological Types of Magnetic Shear Development and Their Relation to Flares
H. Kurokawa **113**, 259
Delta Spots and Great Flares
Harold Zirin and Margaret A. Liggett **113**, 267

Active Regions, Magnetic Field
Some Results of a Morphological Study of the Evolution of the Active Region of July, 1982
M. B. Ogir, L. D. Parfinenko, and M. N. Stoyanova **102**, 67
Delta-Configurations: Flare Activity and Magnetic-Field Structure
S. R. Patty and M. J. Hagyard **103**, 111
On the Initial Orientation of Emerging Active Regions
J. I. Garcia de la Rosa **103**, 249
Chromospheric 'Active Region Loops'
C. Fang and M. J. Martres **105**, 51
A Study of Ratan-600 Observations of Solar *S*-Component Sources
A. Krüger, J. Hildebrandt, V. M. Bogod, A. N. Korzhavin, Sh. B. Akhmedov, and G. B. Gelfreikh **105**, 111
On the Magnetic Field Line Topology in Solar Active Regions
N. Seehafer **105**, 223
Measurements of Magnetic Fields in Solar Corona as Based on the Radio Observations of the Inversion of Polarization of Local Sources at Microwaves
G. B. Gelfreikh, N. G. Peterova, and B. I. Ryabov **108**, 89
Flare and Filament Activation in an Unusually Distorted Field Configuration
A. Hofmann, J. Rendtel, H. Aurass, and B. Kalman **108**, 151
Explorations of Electric Current System in Solar Active Regions. I: Empirical Inferences of the Current Flows
Y. J. Ding, M. J. Hagyard, A. C. DeLoach, Q. F. Hong, and X. P. Liu **109**, 307
A Study of Magnetic Energy Build-up Based on Vector Magnetograms
T. Sakurai **113**, 137
Flare Research with the NASA/MSFC Vector Magnetograph: Observed Characteristics of Sheared Magnetic Fields That Produce Flares
R. L. Moore, M. J. Hagyard, and J. M. Davis **113**, 347

Active Regions, Models
Mg VII and Si IX Line Radios in the Sun
F. P. Keenan, A. E. Kingston, K. M. Aggarwal, and K. G. Widing **103**, 225

Active Regions, Stellar (*see Stellar Physics*)

Active Regions, Velocity Field
The Separation Velocity of Emerging Magnetic Flux
Dean-Yi Chou and Haimin Wang **110**, 81

Atlas's, Catalogs, Films, Observations Available
An Atlas of Photospheric Magnetic Field Observations and Computed Coronal Magnetic Fields: 1976-1985
J. Todd Hoeksema and Philip H. Scherrer **105**, 205

Atmospheres, Stellar (*see Stellar Physics*)

Atmospheric Extinction (*see Earth's Atmosphere*)

Atmospheric Seeing (*see Earth's Atmosphere*)

Atomic Parameters
Wavelength Predictions for the $1s^2 2s$-$1s2s3p$ Satellite Transitions
Massimo Mazzoni **103**, 231

Aurora (*see Magnetosphere*)

Center-Limb Observations

The Center-to-Limb Wavelength Shift of a Number of Fraunhofer Lines
James Charles LoPresto and A. Keith Pierce **102**, 21
The Blanketing in the Rocket Ultraviolet from 225.2 to 319.6 nm
S. N. Osipov **102**, 29
The Effect of Spatial Smearing on Solar Doppler Measurements. II: General Formulation and Application to Limb Effect and Large-Scale Velocity Fields
B. N. Andersen **107**, 27
The Contrast of Faculae near the Solar Limb
H. Wang and H. Zirin **110**, 281
Closed Magnetic Structures in the Chromosphere and in the Transition Region
J. M. Malherbe, B. Schmieder, G. Simon, P. Mein, and E. Tandberg-Hanssen **112**, 233
A Statistical Study of the Geometrical Wilson Effect
M. Collados, J. C. Del Toro Iniesta, and M. Vazquez **112**, 281

Center-Limb Observations, Brightness
Asymmetry and Variations of Solar Limb Darkening along the Diameter Defined by Diurnal Motion in April 1981
Heinz Neckel and Dietrich Labs **110**, 139
The Contrast of Faculae near the Solar Limb
H. Wang and H. Zirin **110**, 281

Center-Limb Observations, Line Profiles
The Center-to-Limb Wavelength Shift of a Number of Fraunhofer Lines
James Charles LoPresto and A. Keith Pierce **102**, 21
Manganese and Carbon Lines as Temperature Indicators
G. Elste **107**, 47
Polarimetry in the Mg II h and k Lines
W. Henze and J. O. Stenflo **111**, 243

Chromosphere, Active (*see Active Regions*)

Chromosphere, Heating (*see Heating, Atmospheric*)

Chromosphere, Models
Emission Curve of Growth for Fe II in Chromospheric Limb Spectra
Y. Hanaoka, I. Tsuda, K. Sadakane, and M. Kanno **106**, 87

Chromosphere, Network
Solar Irradiance Variations from Photometry of Active Regions
G. A. Chapman and A. D. Meyer **103**, 21
The Rotation of Calcium Plages in the Years 1967-1970
Maurizio Ternullo **105**, 197
Time-Varying Sources Derived from EUV Spectroheliograms of the Quiet Sun
Takara Nishikawa **105**, 339
Lines in the Wavelength Range λλ4300-6700 Å with Large Stokes *V* Amplitudes outside Sunspots
S. K. Solanki, F. G. E. Pantellini, and J. O. Stenflo **107**, 57
Sunspot Cycle Variations of Ensemble-Averaged Active Regions
John K. Lawrence **110**, 73
The Old Calcium Plages Differential Rotation Latitudinal Profile: Its Gross and Fine Structure Evolution with the Solar Cycle
Maurizio Ternullo **112**, 143
The Impact of Aging on the Rotation Rate of Calcium Plages in the Years 1967-1977
Maurizio Ternullo **112**, 153

Chromosphere, Spectrum
Continuous Spectral Observations of Spicules
E. V. Khutsishvili **106**, 75
Emission Curve of Growth for Fe II in Chromospheric Limb Spectra
Y. Hanaoka, I. Tsuda, K. Sadakane, and M. Kanno **106**, 87
Observational Maps of the Moments of Strong Line Profiles on the Solar Disk *(Letter)*
B. Caccin, A. Donati-Falchi, R. Falciani, L. A. Smaldone, and G. P. Tozzi **112**, 383

Chromosphere, Stellar (*see Stellar Physics*)

Chromosphere, Structures
An Investigation of the Linear Polarization in Emission Features of Active Regions
N. M. Firstova **103**, 11
Time-Varying Sources Derived from EUV Spectroheliograms of the Quiet Sun
Takara Nishikawa **105**, 339
Shifts of the Ca II K Line in He I 10830 Dark Points
Rush D. Holt and D. J. Mullan **107**, 63

Chromosphere, Velocity Fields (*see Velocity Fields, Chromosphere*)

Convection Zone
Properties of *r*-Modes in the Sun
Charles L. Wolff and Jane B. Blizard **105**, 1

Corona
Numerical Image Processing Applied to the Solar Corona
J. M. Malherbe, J. C. Noëns, and Th. Roudier **103**, 393
Large-Scale Structure of the Sun's Corona from Radio Observations Using the Clark Lake Radioheliograph
M. R. Kundu, T. E. Gergely, E. J. Schmahl, A. Szabo, R. Loiacono, Z. Wang, and R. A. Howard **108**, 113
Variation of the Solar Constant Connected with the Coronal Activity
Judit Pap **109**, 373
Meterwave Observations of a Coronal Hole
Z. Wang, E. J. Schmahl, and M. R. Kundu **111**, 419
Imaging Observations of Radio Bursts at Meter-Decameter Wavelengths
Mukul R. Kundu **113**, 87

Corona, Active
The Stationary Post-Flare Arch of May 21 / 22, 1980
Paul Hick and Zdeněk Švestka **102**, 147
A Numerical Hydrodynamic Model of a Heated Coronal Loop
Peter MacNeice **103**, 47
Images of Post-Flare Coronal Structures in X-Rays (*Extended Abstract*)
Z. Švestka and P. Hick **104**, 187
Coronal Interconnection of Two Active Regions Observed in 3.5-8.0 keV X-Rays
František Fárník, H. Frank van Beek, and Zdeněk Švestka **104**, 321
Culgoora Radio and Skylab EUV Observations of Emerging Magnetic Flux in the Lower Corona
R. T. Stewart, G. E. Brueckner, and K. P. Dere **106**, 107
Thermal Structures Associated with Post-Flare Coronal Arches
Paul Hick and Zdeněk Švestka **108**, 315
Resistive Ballooning Modes in Line-Tied Coronal Fields. II: Loops
M. Velli and A. W. Hood **109**, 351
High-Frequency Oscillations in the Corona Observed at the 1983 Eclipse
Jay M. Pasachoff and Edwin F. Ladd **109**, 365 *Addendum 110, 412*

Corona, F (*see Corona*)

Corona, K
The *K*-Corona under Hydrostatic Density Distribution: Relevance to Solar Wind
O. G. Badalyan and M. A. Livshits **103**, 385
Lifetime, Age, and Rotation of Coronal Magnetic Fields
Gary D. Parker **104**, 333
Radial Variation of Differential Rotation in the Solar Electron Corona
G. D. Parker **108**, 77

Corona, Magnetic Fields (*see Magnetic Fields, Corona*)

Corona, Models
Analysis of an Elongated Narrow Coronal Streamer Observed at the 1973 Solar Eclipse
Hugo E. Trigoso and Tokio Tsubaki **103**, 41
The *K*-Corona under Hydrostatic Density Distribution: Relevance to Solar Wind
O. G. Badalyan and M. A. Livshits **103**, 385
Dynamics of Electron Beams in a Coronal Loop and the Hard X-Ray Burst
Tatsuo Takakura **104**, 363
The Innermost Corona Observed at the 1973 June 30 Eclipse
Yoichiro Hanaoka, Mitsuo Kanno, Hiroki Kurokawa, and Tokio Tsubaki **106**, 95
Meterwave Observations of a Coronal Hole
Z. Wang, E. J. Schmahl, and M. R. Kundu **111**, 419
Alfvén Wave Growth Driven by Streaming Protons in Coronal Loops
David H. Tamres, D. B. Melrose, and Richard C. Canfield **113**, 313

Corona, Quiet (*see Corona*)

Corona, Spectrum
The Innermost Corona Observed at the 1973 June 30 Eclipse
Yoichiro Hanaoka, Mitsuo Kanno, Hiroki Kurokawa, and Tokio Tsubaki **106**, 95

Corona, Stellar (*see Stellar Physics*)

Corona, Structures
The Stationary Post-Flare Arch of May 21 / 22, 1980
Paul Hick and Zdeněk Švestka **102**, 147
On the Formation of Coronal Cavities
C.-H. An, S. T. Suess, E. Tandberg-Hanssen, and R. S. Steinolfson **102**, 165
Images of Post-Flare Coronal Structures in X-Rays (*Extended Abstract*)
Z. Švestka and P. Hick **104**, 187
Coronal Interconnection of Two Active Regions Observed in 3.5-8.0 keV X-Rays
František Fárník, H. Frank van Beek, and Zdeněk Švestka **104**, 321
Time-Varying Sources Derived from EUV Spectroheliograms of the Quiet Sun
Takara Nishikawa **105**, 339
Coronal Bright Points at 6 cm Wavelength
Q. Fu, M. R. Kundu, and E. J. Schmahl **108**, 99
Large-Scale Structure of the Sun's Corona from Radio Observations Using the Clark Lake Radioheliograph
M. R. Kundu, T. E. Gergely, E. J. Schmahl, A. Szabo, R. Loiacono, Z. Wang, and R. A. Howard **108**, 113
Thermal Structures Associated with Post-Flare Coronal Arches
Paul Hick and Zdeněk Švestka **108**, 315
Resistive Ballooning Modes in Line-Tied Coronal Fields. II: Loops
M. Velli and A. W. Hood **109**, 351
6 and 20 cm Wavelength Observations of Coronal Bright Points *(Extended Abstract)*
M. R. Kundu, E. J. Schmahl, and Q.-J. Fu **113**, 305

Corona, Temperature
Comparison of Computed Fluxes for Fe X and Fe XIV Lines with Observed Values at 1980 Eclipse
P. K. Raju and Jagdev Singh **110**, 271

Corona, Velocity Fields (*see Velocity Fields*)

Coronal Arches (*see Corona, Structures*)

Coronal Heating (*see Heating, Atmospheric*)

Coronal Holes
Helium and Minor Ions in the Corona and Solar Wind: Dynamics and Charge States
A. Bürgi and J. Geiss **103**, 347
Semi-Regularities in the Photospheric Magnetic Fields
Rajendra N. Shelke and M. C. Pande **105**, 257
The Sources of Large-Scale Heliospheric Disturbances
A. Hewish and S. Bravo **106**, 185
Shifts of the Ca II K Line in He I 10830 Dark Points
Rush D. Holt and D. J. Mullan **107**, 63
Large-Scale Structure of the Sun's Corona from Radio Observations Using the Clark Lake Radioheliograph
M. R. Kundu, T. E. Gergely, E. J. Schmahl, A. Szabo, R. Loiacono, Z. Wang, and R. A. Howard **108**, 113
Magnetohydrodynamic Tube Waves and High Speed Solar Wind Streams
P. S. Cally **108**, 183
Meterwave Observations of a Coronal Hole
Z. Wang, E. J. Schmahl, and M. R. Kundu **111**, 419
Quiet Sun and Slowly Varying Component at Meter and Decameter Wavelengths
P. Lantos, C. E. Alissandrakis, T. Gergely, and M. R. Kundu **112**, 325

Coronal Loops (*see Corona, Active*)

Coronal Mass Ejections
Coronal Mass Ejection Associated with the Stationary Post-Flare Arch of 21-22 May 1980
Marie K. McCabe, Zdeněk Švestka, Russell A. Howard, Bernard V. Jackson, and Neil R. Sheeley, Jr. **103**, 399
The Relation between Flare-Related Metric Continuum Bursts and Coronal Mass Ejections
R. D. Robinson **104**, 33
Type IV Bursts and Coronal Mass Ejections
T. E. Gergely **104**, 175
Properties of Metre-Wavelength Solar Bursts Associated with Coronal Mass Ejections
R. D. Robinson, R. T. Stewart, N. R. Sheeley, Jr., R. A. Howard, J. Koomen, and D. J. Michels **105**, 149
The Sources of Large-Scale Heliospheric Disturbances
A. Hewish and S. Bravo **106**, 185
The Shape of Buoyant Coronal Loops in a Magnetic Field and the Eruption of Coronal Transients and Prominences
P. K. Browning and E. R. Priest **106**, 335
Activity Associated with the Solar Origin of Coronal Mass Ejections
D. F. Webb and A. J. Hundhausen **108**, 383
Relationships among Flare Images at Different Wavelengths
Zdeněk Švestka **113**, 67

Coronal Streamers
Analysis of an Elongated Narrow Coronal Streamer Observed at the 1973 Solar Eclipse
Hugo E. Trigoso and Tokio Tsubaki **103**, 41
Large-Scale Structure of the Sun's Corona from Radio Observations Using the Clark Lake Radioheliograph
M. R. Kundu, T. E. Gergely, E. J. Schmahl, A. Szabo, R. Loiacono, Z. Wang, and R. A. Howard **108**, 113
Propagation of Electrons Emitting Weak Type III Bursts in Coronal Streamers
N. Gopalswamy, M. R. Kundu, and A. Szabo **108**, 333
A Type IV Burst Associated with a Coronal Streamer Disruption Event
M. R. Kundu **111**, 53
Quiet Sun and Slowly Varying Component at Meter and Decameter Wavelengths
P. Lantos, C. E. Alissandrakis, T. Gergely, and M. R. Kundu **112**, 325

Coronal Transients (*see Coronal Mass Ejections*)

Cosmic Rays, Galactic
Solar Neutrino Flux, Cosmic Rays, and the Solar Activity Cycle
Probhas Raychaudhuri **104**, 415
Influence of Magnetic Clouds on Cosmic Ray Intensity Variation
Badruddin, R. S. Yadav, and N. R. Yadav **105**, 413
Long-Term Variations in North-South Asymmetry of Solar Activity
Derek B. Swinson, Hisako Koyama, and Takao Saito **106**, 35
Unusual Enhancement of Galactic Cosmic-Ray Intensity near an Interplanetary Magnetic Field Annihilation Region
S. Pintér, K. Kecseméty, and A. Varga **106**, 201
On the Proposed Associations of Solar Neutrino Flux with Solar Particles, Cosmic Rays, and the Solar Activity Cycle
Robert M. Wilson **112**, 1

Current Sheets (*see Electric Currents and Current Sheets*)

Earth's Atmosphere
Atmospheric Temperature Response to Solar Cycle UV Flux Variations
Ilias M. Vardavas **108**, 403

Eclipses
Analysis of an Elongated Narrow Coronal Streamer Observed at the 1973 Solar Eclipse
Hugo E. Trigoso and Tokio Tsubaki **103**, 41
The Post Flare Loops Observed at the Total Eclipse of February 16, 1980
Yoichiro Hanaoka, Hiroki Kurokawa, and Sumisaburo Saito **105**, 133
The Innermost Corona Observed at the 1973 June 30 Eclipse
Yoichiro Hanaoka, Mitsuo Kanno, Hiroki Kurokawa, and Tokio Tsubaki **106**, 95
Timing of the 1984 Total Solar Eclipse and the Size of the Sun
Jay M. Pasachoff and Brant O. Nelson **108**, 191
High-Frequency Oscillations in the Corona Observed at the 1983 Eclipse
Jay M. Pasachoff and Edwin F. Ladd **109**, 365 *Addendum 110, 412*
Comparison of Computed Fluxes for Fe X and Fe XIV Lines with Observed Values at 1980 Eclipse
P. K. Raju and Jagdev Singh **110**, 271

Editorials
Editorial
Cornelis de Jager and Zdeněk Švestka **107**, 201
Editorial
Cornelis de Jager, Zdeněk Švestka, and Robert F. Howard **107**, 202

Electric Currents and Current Sheets
Magnetic Reconnection in a High-Temperature Plasma of Solar Flares. II: Effects Caused by Transverse and Longitudinal Magnetic Fields
B. V. Somov and V. S. Titov **102**, 79
Laboratory Simulation of Energy Release in Solar Flares
A. T. Altyntsev, V. M. Bardakov, V. I. Krasov, N. V. Lebedev, V. L. Paperny, and V. G. Simonov **106**, 131
Fast Oscillations and Particle Acceleration in the Neutral Sheet
Ding Jiu-Ping, Zhang Cheng-Yue, and Li Hong-Wei **106**, 379
Field-Aligned Electric Field Caused by the Decay of Force-Free Magnetic Field and Particle Acceleration
T. Takakura **107**, 283
Coincidence between Hα Flare Kernels and Peaks of Observed Longitudinal Electric Current Densities
Lin Yuanzhang and V. Gaizauskas **109**, 81
Explorations of Electric Current System in Solar Active Regions. I: Empirical Inferences of the Current Flows
Y. J. Ding, M. J. Hagyard, A. C. DeLoach, Q. F. Hong, and X. P. Liu **109**, 307
Large-Scale Electric Fields in Post-Flare Loops
Satoshi Hinata **109**, 321
Acceleration and Energization by Currents and Electric Fields
A. O. Benz **111**, 1
Evolution of Emerging Force-Free Flux Tube to be a Flare Loop
T. Takakura **113**, 221
Subphotospheric Current Systems and Flares
Hugh S. Hudson **113**, 315

Ellerman Bombs
A Detection of the Faraday Rotation by the Solar Vector Magnetograph
Mitsugu Makita **103**, 1
An Investigation of the Linear Polarization in Emission Features of Active Regions
N. M. Firstova **103**, 11
Observations of Ellerman Bombs in Hα
Th. G. Zachariadis, C. E. Alissandrakis, and G. Banos **108**, 227

Emission, Particle (*see Energetic Particles*)

Emission, X-Ray
The Cyclical Variation of Energy Flux and Photospheric Magnetic Field Strength from Coronal Holes
David F. Webb and John M. Davis **102**, 177

Energetic Particles
A Spatially Confined Long-Lived Stream of Solar Particles
K. A. Anderson and W. M. Dougherty **103**, 165
Interplanetary Phenomena and Solar Radio Bursts
G. M. Simnett **104**, 67
Solar Flare Neutron Production and the Angular Dependence of the Capture Gamma-Ray Emission
X.-M. Hua and R. E. Lingenfelter **107**, 351
Characteristics of Solar Coronal Source Regions Producing ^{3}He-Rich Particle Events
S. W. Kahler, R. P. Lin, D. V. Reames, R. G. Stone, and M. Liggett **107**, 385
Solar Flare Neutrons and Their Capture Gamma Ray Emission
X.-M. Hua and R. E. Lingenfelter **113**, 229
Possible Solar Neutron Events Recorded by the Ground-Based Neutron Monitor
M. Yoshimori, K. Takahashi, M. Wada, M. Kusunose, and I. Kondo **113**, 319

Energetic Particles, Abundances (*see Energetic Particles; Abundances*)

Energetic Particles, Acceleration
A Spatially Confined Long-Lived Stream of Solar Particles
K. A. Anderson and W. M. Dougherty **103**, 165
Fast Oscillations and Particle Acceleration in the Neutral Sheet
Ding Jiu-Ping, Zhang Cheng-Yue, and Li Hong-Wei **106**, 379
Stochastic Acceleration of Electrons in Solar Flares
A. O. Benz and D. F. Smith **107**, 299
'Particle Acceleration and Trapping in Solar Flares', Workshop held at Aubigny-sur-Nère, France, June 23-26, 1986, *Table of Contents*
111, v
'Particle Acceleration and Trapping in Solar Flares', Workshop held at Aubigny-sur-Nère, France, June 23-26, 1986, *Preface*
Gérard Trottet and Monique Pick **111**, vii
Acceleration and Energization by Currents and Electric Fields
A. O. Benz **111**, 1
Electron Acceleration within Coronal Loops: A Wave-Particle Process?

Granulation, Models (*see Granulation*)

Heating, Atmospheric
Long Nonlinear Waves in a Compressible Magnetically Structured Atmosphere. II: Slow Body Waves in a Magnetic Slab
E. G. Merzljakov and M. S. Ruderman **103**, 259

Heating, in Flares
The Excitation of the Iron Kα Feature in Solar Flares
A. Gordon Emslie, Kenneth J. H. Phillips, and Brian R. Dennis **103**, 89
The Structure of High-Temperature Flare Plasma. II: Comparison with Observations
A. Gordon Emslie **103**, 103
Laboratory Simulation of Energy Release in Solar Flares
A. T. Altyntsev, V. M. Bardakov, V. I. Krasov, N. V. Lebedev, V. L. Paperny, and V. G. Simonov **106**, 131
Collisional Heating by Nonthermal Electrons in a Tapered Magnetic Loop
S. Chandrashekar and A. Gordon Emslie **107**, 83
The Gradual and Impulsive Reconnection and the Preheating of Solar Flares
Hong-Wei Li, R. Pallavicini, and Chung-Chieh Cheng **107**, 271
A Magnetodynamic Mechanism for Loop Flares
Yutaka Uchida **113**, 125
Electron-Heated Flares Models - Alive and Well
A. Gordon Emslie **113**, 175

Imaging
Numerical Image Processing Applied to the Solar Corona
J. M. Malherbe, J. C. Noëns, and Th. Roudier **103**, 393
Interferometric Imaging: A Numerical Simulation
J. B. Zirker **111**, 235

Instabilities
Ballooning Instabilities in the Solar Corona: Conditions for Stability
A. W. Hood **103**, 329
A Model of Ultra-Fast Fine Structures of Microwave Bursts
Ren-Yang Zhao and Jian-Kui Shi **104**, 137
The Ideal Magnetohydrodynamic Stability of a Line-Tied Coronal Magnetohydrostatic Equilibrium
J. P. Melville, A. W. Hood, and E. R. Priest **105**, 291
Resistive Ballooning Modes in Line-Tied Coronal Fields. I: Arcades
M. Velli and A. W. Hood **106**, 353
Topological Stability of Finite-Length Magnetic Flux Tubes
N. Seehafer **107**, 73
Stability Analysis of Two-Dimensional Models of Quiescent Prominences
J. Galindo Trejo **108**, 265
A Linear MHD Instability Analysis of Solar Mass Ejections with Gravitation
M. T. Song, S. T. Wu, and M. Dryer **108**, 347
Resistive Ballooning Modes in Line-Tied Coronal Fields. II: Loops
M. Velli and A. W. Hood **109**, 351
Fine Structures in Solar Microwave Flares
N. Gopalswamy **110**, 327
Effects of Turbulence Development in Solar Surges
Vicenzo Carbone, Giorgio Einaudi, and Pierluigi Veltri **111**, 31
Electron Cyclotron Maser Emission from Solar Flares
Loukas Vlahos **111**, 155
The Saturation of Electron Cyclotron Maser and the Time Profile of Emitted Spikes
Hong-Wei Li **111**, 167
The Structure and Stability of Coronal Magnetic Fields
A. N. McClymont and I. J. D. Craig **113**, 131

Instrumental Effects
The Effect of Spatial Smearing on Solar Doppler Measurements. II: General Formulation and Application to Limb Effect and Large-Scale Velocity Fields
B. N. Andersen **107**, 27

Instrumentation
A Simple Irradiance Monitor for Testing Solar Global Oscillation Network Sites
George Fischer, Frank Hill, Wayne Jones, John Leibacher, William McCurnin, Robin Stebbins, and Jeremy Wagner **103**, 33
Ultraviolet Solar Irradiance Measurement from 200 to 356 nm during Spacelab I Mission
D. Labs, H. Neckel, P. C. Simon, and G. Thuillier **107**, 203
A Windscreen around the Heliostat of the McMath Solar Telescope
A. Keith Pierce **107**, 397
The Faraday Effect in a Magneto-Optical Filter
T. Appourchaux **109**, 393
A Long-Duration Payload for Hard X-Ray and Gamma-Ray Observations of the Sun
R. P. Lin, D. W. Curtis, J. H. Primbsch, P. R. Harvey, W. K. Levedahl, D. M. Smith, R. M. Pelling, F. Duttweiler, and K. Hurley **113**, 333
The Solar-A Mission
Y. Ogawara **113**, 361

Intergranular Region and Subgranular Structures
The Morphology of Solar Granulations and Dark Networks
J. Elon Graves and A. Keith Pierce **106**, 249
Structure of the Solar Granulation
Th. Roudier and R. Muller **107**, 11
Bright Threads in the Inner Wing of Solar Ca II K Line
Z. Suemoto, E. Hiei, and Y. Nakagomi **112**, 59

Integrated Light Observations
Results of the Solar Constant Experiment Onboard Spacelab 1
D. A. Crommelynck, R. W. Brusa, and V. Domingo **107**, 1
Temporal Trends of Solar EUV and UV Full-Disk Fluxes
Richard F. Donnelly **109**, 37
Sun as a Star: Rotation Rates from the Ca K-Index
Jagdev Singh and W. C. Livingston **109**, 387

Interferometry
Solar *VLBI* of Compact Transient Sources
K. F. Tapping **104**, 199
Interferometric Imaging: A Numerical Simulation
J. B. Zirker **111**, 235

Interior, Solar
Evidence for a Small, High-Z, Iron-Like Solar Core. II: Agreements with Observed Frequencies of Oscillation in the Five-Minute Band
Carl A. Rouse **106**, 205
Evidence for a Small, High-Z, Iron-Like Solar Core. III: Sensitivity Study of the Nearly Constant Frequency Differences in the Five-Minute Band
Carl A. Rouse **106**, 217
The Dynamo Dilemma
E. N. Parker **110**, 11
Evidence for a Small, High-Z, Iron-Like Solar Core. IV: Sensitivity Studies of the Five-Minute Band Frequencies to the Gravitational Perturbation and of the 160-Minute Period of Oscillation to the Space Mesh
Carl A. Rouse **110**, 211
Magnetic Waves of Solar Activity
V. I. Makarov, A. A. Ruzmaikin, and S. V. Starchenko **111**, 267

Subphotospheric Current Systems and Flares
Hugh S. Hudson **113**, 315

Interior, Magnetic Field Theory (*see Interior*)

Interior, Stellar (*see Stellar Physics*)

Nuclear Processes and Accelerated Particles in Solar Flares
R. Ramaty **113**, 203

Plages (*see Chromosphere, Network*)

Plasma Instabilities (*see Plasma Physics; Instabilities*)

Plasma Physics
A Model of Ultra-Fast Fine Structures of Microwave Bursts
Ren-Yang Zhao and Jian-Kui Shi **104**, 137
Fast Oscillations and Particle Acceleration in the Neutral Sheet
Ding Jiu-Ping, Zhang Cheng-Yue, and Li Hong-Wei **106**, 379
Particle Interactions with Alfvén Solitons
C. R. Ovendon, H. A. Shah, and S. J. Schwartz **107**, 173
Quasi-Monochromatic Wave-Particle Interactions in Magnetospheric Plasmas
D. Le Quéau and A. Roux **111**, 59
Plasma Emission: A Review
D. B. Melrose **111**, 89

Plasma, Particle Acceleration (*see Plasma Physics*)

Polarization
Polarization in Spectral Lines. IV: Resonance Polarization in the Hanle Effect, Collisionless Regime
E. Landi Degl'Innnocenti **102**, 1
A Detection of the Faraday Rotation by the Solar Vector Magnetograph
Mitsugu Makita **103**, 1
An Investigation of the Linear Polarization in Emission Features of Active Regions
N. M. Firstova **103**, 11
Discussion of a Possible Magnetic Transient in UVSP Observations
William Henze, Jr. **104**, 359
An Interpretation of the Broad-Band Circular Polarization of Sunspots
Mitsugu Makita **106**, 269
Linear Polarization of 4.43 MeV $^{12}C^*$ and 6.13 MeV $^{16}O^*$ Gamma-Rays as Indicators of Directions of Particles in Solar Flares
Zdzislaw P. Sawa **107**, 167
Polarimetry in the Mg II h and k Lines
W. Henze and J. O. Stenflo **111**, 243
The Faraday Rotation of Sunspots
Ye Shi-Hui and Jin Jie-Hai **112**, 305

Polarization, Instrumental (*see Instrumental Effects*)

Polarization, Line (*see Polarization*)

Polarization, Radio
The Polarization of Decimetric Pulsations
M. J. Aschwanden **104**, 57
The Characteristics of Type IV-Associated Spikes at Metric Wavelengths
M. Nonino, A. Abrami, M. Comari, M. Messerotti, and P. Zlobec **104**, 111
Behaviour of the Polarization at dm-m Wavelengths during the Evolution of Five Two-Ribbon Flares
V. Ruždjak, B. Vršnak, P. Zlobec, and A. Schroll **104**, 169
Gyrosynchroton Emission of Solar Flares
C. E. Alissandrakis **104**, 207
A Study of Ratan-600 Observations of Solar *S*-Component Sources
A. Krüger, J. Hildebrandt, V. M. Bogod, A. N. Korzhavin, Sh. B. Akhmedov, and G. B. Gelfreikh **105**, 111

Radio Evidence for a Delayed Acceleration Process in Solar Flares
K. Kai, H. Nakajima, T. Kosugi, R. T. Stewart, G. J. Nelson, and S. R. Kane **105**, 383
Measurements of Magnetic Fields in Solar Corona as Based on the Radio Observations of the Inversion of Polarization of Local Sources at Microwaves
G. B. Gelfreikh, N. G. Peterova, and B. I. Ryabov **108**, 89
The Mean Coronal Magnetic Field Determined from Helios Faraday Rotation Measurements
M. Pätzold, M. K. Bird, H. Volland, G. S. Levy, B. L. Seidel, and C. T. Stelzried **109**, 91
Harmonic Emission and Polarization of Milli-Second Radio Spikes
A. O. Benz and M. Güdel **111**, 175
Low-Level Decimetric (1.6 GHz) Solar Burst Activity
H. S. Sawant, J. E. R. Costa, R. H. Trevisan, C. J. B. Lattari, and P. Kaufmann **111**, 189
Herringbone Bursts Associated with Type II Solar Radio Emission
I. H. Cairns and R. D. Robinson **111**, 365
Solar Radio Pulsations at 410 MHz
C. S. Wright and G. J. Nelson **111**, 385
Microwave Emission above Steady and Moving Sunspots
F. Chiuderi Drago, C. Alissandrakis, and M. Hagyard **112**, 89
Microwave Spectroscopy as a Diagnostic of Solar Flares: The Effect of Source Inhomogeneity *(Extended Abstract)*
G. J. Hurford and D. E. Gary **113**, 183

Prominences
On the Formation of Coronal Cavities
C.-H. An, S. T. Suess, E. Tandberg-Hanssen, and R. S. Steinolfson **102**, 165
Coronal Mass Ejection Associated with the Stationary Post-Flare Arch of 21-22 May 1980
Marie K. McCabe, Zdeněk Švestka, Russell A. Howard, Bernard V. Jackson, and Neil R. Sheeley, Jr. **103**, 399
A Siphon Mechanism for Supplying Prominence Mass
A. I. Poland and John T. Mariska **104**, 303
Energy Interconnection between the Plasma Cloud Ejected from the Active Region and the Shock Wave
I. N. Garczyńska and B. Rompolt **105**, 101
Preflare Energy Build-up in a Filament Circuit
P. C. H. Martens **107**, 95
Quiescent Prominences - Where Are They Formed
Frances Tang **107**, 233
A Linear MHD Instability Analysis of Solar Mass Ejections with Gravitation
M. T. Song, S. T. Wu, and M. Dryer **108**, 347
Material Ejecta in a Disturbed Solar Filament
M. A. Raadu, J. M. Malherbe, B. Schmieder, and P. Mein **109**, 59
Hydrogen Emission from Moving Solar Prominences
P. Heinzel and B. Rompolt **110**, 171
The Stability of Line Tied Force-Free Cylindrical Arcades: Is an Active Region Filament a Requirement for a Two-Ribbon Flare?
A. Hood and U. Anzer **111**, 333

Prominences, Active
Coronal Mass Ejection Associated with the Stationary Post-Flare Arch of 21-22 May 1980
Marie K. McCabe, Zdeněk Švestka, Russell A. Howard, Bernard V. Jackson, and Neil R. Sheeley, Jr. **103**, 399
A Small-Scale Energy Release Observed on the Limb. I: The Broadened Components of D3 Emission Lines
Ichiro Kawaguchi, Kap-Sung Kim, and Yoshihiro Nakai **106**, 47

Prominences, Dynamics
Material Ejecta in a Disturbed Solar Filament
M. A. Raadu, J. M. Malherbe, B. Schmieder, and P. Mein **109**, 59
Hydrogen Emission from Moving Solar Prominences
P. Heinzel and B. Rompolt **110**, 171

Impulsive Brightenings/Velocity Transients in Quiescent Solar Prominences. II: Time Varying Reversal Regions
G. D. Toot and J. M. Malville **112**, 67

Prominences, Eruptive
Energy Interconnection between the Plasma Cloud Ejected from the Active Region and the Shock Wave
I. N. Garczyńska and B. Rompolt **105**, 101
Physical Conditions in Eruptive Prominences at Several Solar Radii
Rainer M. E. Illing and R. Grant Athay **105**, 173
Disappearing Solar Filaments and Geomagnetic Activity
J. Hanumath Sastri **105**, 191
Two Types of Flare-Associated Filament Eruptions
Frances Tang **105**, 399
The Shape of Buoyant Coronal Loops in a Magnetic Field and the Eruption of Coronal Transients and Prominences
P. K. Browning and E. R. Priest **106**, 335
Rotating Eruption of an Untwisting Filament Triggered by the 3B Flare of 25 April, 1984
Hiroki Kurokawa, Yoichiro Hanaoka, Kazunari Shibata, and Yutaka Uchida **108**, 251
Activity Associated with the Solar Origin of Coronal Mass Ejections
D. F. Webb and A. J. Hundhausen **108**, 383
Material Ejecta in a Disturbed Solar Filament
M. A. Raadu, J. M. Malherbe, B. Schmieder, and P. Mein **109**, 59
Characteristics of the Expansion Associated with Eruptive Prominences
R. G. Athay, B. C. Low, and B. Rompolt **110**, 359
North-South Asymmetry in Sudden Disappearances of Solar Prominences
G. Vizoso and J. L. Ballester **112**, 317
Observed Form and Action of the Magnetic Field in Flares *(Extended Abstract)*
Ronald L. Moore **113**, 121

Prominences, Loop (***see Flares, Loop***)

Prominences, Magnetic Fields (***see Prominences***)

Prominences, Models
Prominence Hydrogen Lines at 10-20 Microns
J. B. Zirker **102**, 33
A Siphon Mechanism for Supplying Prominence Mass
A. I. Poland and John T. Mariska **104**, 303
Physical Conditions in Eruptive Prominences at Several Solar Radii
Rainer M. E. Illing and R. Grant Athay **105**, 173
The Hydrogen Balmer, Paschen, and Brackett Series Lines in Quiescent Prominences
Marta G. Rovira and Juan Manuel Fontenla **106**, 315
Stability Analysis of Two-Dimensional Models of Quiescent Prominences
J. Galindo Trejo **108**, 265
Material Ejecta in a Disturbed Solar Filament
M. A. Raadu, J. M. Malherbe, B. Schmieder, and P. Mein **109**, 59
A Two-Dimensional Model for a Solar Prominence
J. L. Ballester and E. R. Priest **109**, 335
Characteristics of the Expansion Associated with Eruptive Prominences
R. G. Athay, B. C. Low, and B. Rompolt **110**, 359

Prominences, Quiescent
On the Formation of Coronal Cavities
C.-H. An, S. T. Suess, E. Tandberg-Hanssen, and R. S. Steinolfson **102**, 165
Periodic Oscillations Found in the Velocity Field of a Quiescent Prominence
Tokio Tsubaki and Akitsugu Takeuchi **104**, 313
The Hydrogen Balmer, Paschen, and Brackett Series Lines in Quiescent Prominences

X-Ray Bursts, Spectrum
X-Ray Imaging of a Solar Limb Flare on 1982 January 22
T. Takakura, K. Tanaka, N. Nitta, K. Kai, and K. Ohki **107**, 109

X-Ray Bursts, Theory
Can Observed Hard X-Ray and Microwave Flux from Solar Flares Be Explained by a Single Electron Population?
K. Kai **104**, 235
Dynamics of Electron Beams in a Coronal Loop and the Hard X-Ray Burst
Tatsuo Takakura **104**, 363
Comments on the Thick-Target Interpretation of Solar X-Ray Burst 'Stereo' Observations
A. L. MacKinnon **106**, 415
On the Hard X-Ray Spatial Structure during the Impulsive Phase of Solar Flares
A. Gordon Emslie and Marcos E. Machado **107**, 263
Calculation of Anisotropy Ratio of Hard X-Rays from Solar Flares - Evidence for Continuous Electron Injections/Accelerations
Pradman K. Koul, R. R. Rausaria, and P. N. Khosa **108**, 139

The Stability of Electron Beams in the Flaring Solar Corona
K. G. McClements **109**, 355
Hard X-Ray Emission in Electron-Heated Solar Flares - A Comparison of Nonthermal and Thermal Contributions
David G. Brown and A. Gordon Emslie **110**, 305
Hard X-Ray Emission Processes in Solar Flares
N. Vilmer **111**, 207
Propagation and Confinement of Energetic Electrons in Solar Flares
S. R. Kane **113**, 145
A New Thermal Trap Model for Solar Flare Hard X-Ray Bursts: An Electrostatic Trap Model
D. S. Spicer and A. G. Emslie **113**, 237

X-Ray Emission, Stellar (*see Stellar Physics*)

X-Ray Structures
The Stationary Post-Flare Arch of May 21/22, 1980
Paul Hick and Zdeněk Švestka **102**, 147
Coronal Mass Ejection Associated with the Stationary Post-Flare Arch of 21-22 May 1980
Marie K. McCabe, Zdeněk Švestka, Russell A. Howard Bernard V. Jackson, and Neil R. Sheeley, Jr. **103**, 399
Images of Post-Flare Coronal Structures in X-Rays (*Extended Abstract*)
Z. Švestka and P. Hick **104**, 187
Coronal Interconnection of Two Active Regions Observed in 3.5-8.0 keV X-Rays
František Fárník, H. Frank van Beek, and Zdeněk Švestka **104**, 321
X-Ray Imaging of a Solar Limb Flare on 1982 January 22
T. Takakura, K. Tanaka, N. Nitta, K. Kai, and K. Ohki **107**, 109
An Observational Study of the 2B/X2.8 Flare of 30 March, 1982 in Optical, Radio, and X-Ray Ranges
J. L. Wang, T. Takakura, J. Q. Liu, K. Ohki, K. Kawabata, and H. Ogawa **108**, 169
Multi-Thermal Observations of Newly Formed Loops in a Dynamic Flare
Zdeněk Švestka, Juan M. Fontenla, Marcos E. Machado, Sara F. Martin, Donald F. Neidig, and Giannina Poletto **108**, 237
Thermal Structures Associated with Post-Flare Coronal Arches
Paul Hick and Zdeněk Švestka **108**, 315
Simultaneous High Spatial Resolution Observations of Solar Flares in X-Rays and Microwaves
S. Enome **113**, 49
Simultaneous Imaging Observations of the Sun at Microwaves and Hard X-Rays *(Extended Abstract)*
H. Nakajima, T. Takakura, N. Nitta, and K. Ohki **113**, 63
Flaring Arches *(Extended Abstract)*
Sara F. Martin and Zdeněk F. Švestka **113**, 303

Zeeman Effect
Lines in the Wavelength Range λλ4300-6700 Å with Large Stokes *V* Amplitudes outside Sunspots
